**MARINE
DIVISION**

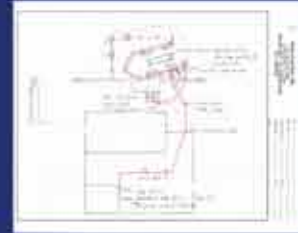

**"We're There When
You Need Us"**

What makes ACRA the BEST and SAFEST...

All jobs receive Electrical Permits and Inspections from the appropriate authorities.

We offer Marine Pedestals with a choice of outlets for any requirement, lighting systems for docks that will last, and remote controls for boat lifts that will add safety and convenience.

1. ACRA works with our customers to design a complete system on paper before we begin work. Drawings are produced for every job detailing scope of work.
2. All docks are wired using heavy wall schedule 80 PVC conduit installed neatly and securely using stainless steel fasteners and copper wiring.
3. Lift motor wiring is GFCI protected per National Electric Code requirements.
4. Lift Controls are hard wired and installed in fiberglass enclosure.
5. Wireless controls by **GEM Remotes** with optional autostop limit switch available.
6. Conduit is never installed under water to outboard lift motors if there is a connection to dock. All boat lift motors are wired for 240 volts for more efficient operation.
7. All ACRA employees undergo training for installation and safety.
